It flowers a week earlier than Tausendschoen or Rosarie under the same conditions and carries handsome, dark green, mildew resisting foliage. It holds the flower unusually long—the color improves with age. Eugene Jacquet should be forced so as to show color ten days before Easter to be at its best for Easter sales.
- GARDENIA** (H. W.)—Bright yellow, cream color when open; very fragrant and free; early flowering. This is the hardy Marechal Niel; double yellow flowering.
- HIAWATHA** (H. W.)—Its flowers are about one and one-half inches across, and produced in long, pendulous sprays, with frequently from forty to fifty flowers on a spray. In color, it is brilliant ruby-carmine, with a clear white eye and a mass of golden stamens.
- JACOTTE** (H. W.)—Bud large, orange and yellow; flower large, semi-double, open, cupped, very lasting; deep coppery yellow tinted coppery red; borne, several together, on long, strong stem; fragrant. Blooms profusely in May and June.
- LADY GAY** (W.)—Flowers of a deep cherry-pink, shading on the edge of the petals to a very delicate soft tone of pink.
- MARY LOVETT** (H. W.)—In this Dr. Van Fleet has brought out another Wichuraiana Hybrid a "White Dr. Van Fleet." This rose has done well and is strongly recommended. Loses foliage early.
- MARY WALLACE** (H. W.)—This is Dr. Van Fleet's master-piece. Blooms two or three times during the summer months. A pillar rose supporting itself in a bushy growth 6 to 8 feet high. Bright clear rose-pink with salmon at base of petals. The largest Hybrid Wichuraiana in existence. Seen this year in all its giant loveliness.
- PAPA GOUCHAULT** (H. Cl.)—A pure crimson red, holding its color under all weather conditions and exceedingly hardy.
- PAUL'S LEMON PILLAR** (Cl. H. T.)—Pale lemon buds and faint sulphur yellow flowers. Double, well formed and fragrant, strong grower.
- PAUL'S SCARLET CLIMBER** (H. W.)—Vivid scarlet, shaded crimson, makes a brilliant display for a long period of time in the garden. A wonderful climbing Rose. We consider it the most wonderful hardy Climbing Rose.
- RED DOROTHY PERKINS, or EXCELSA** (W.)—Ornamental climber which is nearly evergreen; this will assure this lovely pillar Rose a place in every American garden, for it is quite hardy in addition to all its other fine points. The flowers are very double, produced in large trusses of thirty to forty, and almost every eye on a shoot produces clusters of flowers. The color is deep rosy-red, the tips of the petals tinged with scarlet.
- ROSERIE** (Pink Tausendschoen)—This is a bright pink form of Tausendschoen. A grand Rose from any standpoint.
- SHOWER OF GOLD** (H. W.)—The color is a deep golden-yellow, with orange shadings in the center. This fills the "long felt want" for a "Yellow Rambler."
- SILVER MOON** (H. W.)—Flowers very large, four and one-half inches and over in diameter. Pure white in color; petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness.
- TAUSENDSCHOEN, or THOUSAND BEAUTIES** (H. M.)—The flowers upon first opening are the most delicate shade of pink ever seen in a Rose, might be described as a white, delicate flushed pink, changing to rosy-carmine. It gets its name from its many flowers and the variation in coloring.
- VEILCHENBLAU, THE BLUE ROSE** (H. M.)—This is a much better Rose than some give it credit for. It opens a reddish-violet, quickly changing to violet-blue.
- WHITE DOROTHY PERKINS** (W.)—White Dorothy Perkins, in every way is the equal, if not superior, to Crimson Rambler, as a red, and Dorothy Perkins as a Pink. This Rose has no rival as a white climber.

Philodendron Cordatum

This climbing genus has been taken up by the florists' trade in a large way, since this plant adapts itself unusually well to the unnatural conditions of the average home better than most any other plant. A very large demand has ensued from the public. It is particularly suitable for sun parlor decoration, but does equally well in any part of the house, even in comparatively dark situations. Can be grown successfully in pots or hanging baskets, but seems particularly "happy" in wall pockets. Florists have found an unusually large demand for this valuable trailing vine and it can be merchandised with the assurance of giving utmost satisfaction with a minimum of care. It furnishes a beautiful "green atmosphere" and attracts no little attention. Try out this valuable plant in a merchandising way; we are sure you will follow with a repeat order in a short time.

FERNS

Altho we have been increasing our production of *Nephrolepis* Ferns for the past four years, the demand constantly exceeds the supply. Successful fern growing invariably hinges on the cleanliness of the plants. Ours are free from "White Scale." We carry at all times a good supply of 2½ inch ferns.

TEDDY JUNIOR (The Fern for Every Household)—The fronds are broad and beautifully tapered from base to tip; they droop just enough to make a shapely, graceful plant, permitting it to finish with a fine full center and perfect symmetrical spread. The pinnae are distinctly undulated, giving the fronds an attractive wavy appearance, which adds materially to their charming decorative effect. "Teddy Junior" will produce about four times more fronds than any other Fern ever introduced, finishing with fifty to sixty fronds in a four-inch pot.

JOHN WANAMAKER ("The Wanamaker Boston Fern")—A "sport" from *Nephrolepis Scholzei*, with longer, narrower, gracefully drooping fronds. It is not so compact in growth as *Scholzei*, and, therefore, does not decay in the center, and is a durable house Fern. It is a rapid grower; making an abundance of fronds, and is quite distinct from any other *Nephrolepis*.

ROOSEVELT—The pinnae are beautifully undulated, giving the Roosevelt a pronounced wavy effect seen in no other Fern; as the plant ages this effect becomes quite distinct. Our sales of Roosevelt have exceeded two hundred and fifty thousand plants.

WHITMANII (The Ostrich Plume Fern)—The well-known fluffy leaved fern; a popular florists' variety.

WHITMANII COMPACTA ("The Parlor Fern")—This is a condensed form of the "Ostrich Plume" Fern, with valuable characteristics added which are not evident in the parent—the pinnae subdividing, making miniature fronds which are super-imposed on the main fronds, looking as if two or more were condensed in one. Graceful beyond description.

SCHOLZELI ("The Crested Fern")—The fronds, like *Scottii*, stand erect, and with a graceful arch form a plant of ideal shape, and they never break down, giving the plant a ragged appearance, as is so often the case with other plumed forms; furthermore, the loose, elegant arrangement of the fronds, allowing a free circulation of air through the foliage, prevents the center of even the largest specimens from becoming defective or yellow.

BOSTONIENSIS ("The Boston Fern")—A variety that needs no description. Still the most popular of all varieties.

DWARF BOSTON—The most popular of present day ferns. A dwarf type of the popular Boston variety.

GOODI ("The Baby's Breath Fern.")—(Good & Reese.) This Fern is splendid to use for fern dish planting. The finest foliage of all the ferns. Fronds very fluffy. A well-grown specimen is in great demand. It is of easy culture.

SCOTTII ("The Newport Fern.")—It is a rapid grower and to see it in all stages of growth from a runner in the bench to a fourteen-inch pot specimen will convince you that it will be in great demand as a house Fern. This has always been a favorite.

Irvington Beauty (New): Since introducing this beautiful new Geranium in 1927, the demand has constantly exceeded the supply. It is the most prolific of all Geraniums, flowering earlier and later than all other varieties, every branch producing an immense truss of rosy salmon pink flowers. It is not unusual for a four-inch pot plant of Irvington Beauty to show five to seven flower heads at one time. Every progressive florist should grow Irvington Beauty for increased profits. 2 1/4 inch pots, \$1.35 per 12, \$10.00 per 100, \$90.00 per 1000.

Fiat—(The True Variety): No Geranium has ever been so favorably received as Fiat. We have the true stock of Fiat, and will have the largest supply in the country this year. Florists who are not growing Fiat are missing the most brilliantly colored of all Geraniums. Of good growth, and an intense dark salmon pink in color. 2 1/4 inch pots, \$1.35 per 12, \$10.00 per 100, \$90.00 per 1000.

American Beauty: Of the same color as the famous American Beauty Rose. A very free bloomer, and excellent for forcing.

Aurora: Growers who are not growing Aurora are missing one of the finest Geraniums. We consider it distinctly superior to Poitevine because of its better growth and brighter color. A very prolific variety with flowers of beautiful salmon pink.

Beaute Poitevine: For many years Poitevine has ranked as the leading pink Geranium. In color, beautiful shrimp pink. One of the best for pot work.

Comtesse De Harcourt: One of the two best white Geraniums. The large trusses of pure white flowers hold the color in excellent shape.

Helen Michell: The universal favorite where planted. Helen Michell cannot be surpassed in either pot work or outside planting. Enormous trusses bear brilliant scarlet flowers that do not fade in the sun.

Jean Viaud: One of the older favorites that is still used by many growers. The color is rich deep pink, shading to light pink near the base of the petals; the base of the upper petals being creamy white. Jean Viaud is a remarkably good Geranium.

La Favorite: In this Geranium we have the finest double white in cultivation. The flowers are borne in large trusses of the purest snow white, retaining this pure whiteness even in the height of summer. For winter blooming La Favorite is excellent. Your profits will increase by using this favorite.

Madame Barney: A very profuse bloomer, the individual florets being of very large size. The color is pure deep pink. Considered the perfect bedding Geranium.

Madame Landry: The salmon pink Geraniums have been in constant demand for the past five years. We have never been able to grow enough of Madame Landry to supply the demand. The color is dazzling salmon pink with a slight scarlet shading. The flower heads are large and carried on long stems.

Marquis De Montmart: Commonly known as the Blue Geranium. In color a rich soft purple, a very striking color. Of good growth.

Mrs Richard Gloede: A very good new Geranium that is being grown more widely each year. The color is similar to American Beauty but more brilliant. Of good branching growth. \$1.25 per 12; \$8.00 per 100.

Radio Red: The most intense scarlet in cultivation. The color is so brilliant that it instantly commands attention. Radio Red is fast becoming the most widely used red variety. It is the best red Geranium. \$1.00 per 12, \$7.00 per 100, \$65.00 per 1000.

Geranium—Irrvington Beauty

Red Barney: A new variety of brilliant red that is very prolific. For pot forcing it is among the leaders. Of good branching habit.

S. A. Nutt: The darkest and richest Geranium grown. It is deep velvety maroon in color, an excellent bedder and a perfect pot plant. No other Geranium has ever equalled the richness of its coloring.

SWEET-SCENTED GERANIUMS

Lemon: The foliage is pronouncedly lemon scented.

Nutmeg: Foliage has the true nutmeg fragrance.

Rose: The famous sweet rose-scented Geranium; very fragrant. Per 12 \$0.85, Per 100 \$6.00, Per 1000 \$55.00

Single Flowering Varieties

2 1/4 inch pots. Per 12 \$0.85; per 100, \$6.00; per 1000, \$55.00.

Mrs. E. G. Hill: Undoubtedly one of the finest Geraniums ever introduced. A profuse bloomer of soft salmon pink; each petal bordered with rosy salmon.

Pelargoniums, or Lady Washington Geraniums

2 1/4 inch pots. Prices, except as noted, \$1.25 per dozen; per 100, \$9.50; per 1000, \$90.00.

Easter Greeting: Florets fiery amaranth-red, with five large, regular shaped spots.

Gardener's Joy: The ground color is apple-blossom pink, the two upper petals have blotches of carbon-brown, the florets are three and one-half inches in diameter and are joined to enormous clusters which rise above the beautiful foliage and remind one of a Rhododendron cluster.

German Glory: Cattleya blue; crimson spots.

Goethe: Red, deep violet spots.

Lucy Becker: This grand novelty is a sport of Easter Greeting, and is like it in everything but color which is a rosy-pink.

MRS. LAYAL (Pansy Geranium)

Rather dwarf in growth, and resembling the purple pansy. We offer select plants of this florist's variety.

Prince: Immensely large flowers, strongly crimped of fine shade with from six to ten petals; color rich purple with velvety black blotches. Remarkably robust habit. The large clusters rise gracefully above the beautiful foliage. The blooming plant with its enormous flowers makes a striking impression.

Springtime (New): Beautiful white and pink ruffled. 2 1/4 inch pots. \$1.75 per dozen; \$12.50 per 100.

Irvington Beauty and Fiat are the best pink Geraniums.

It is a wonderful grower and has a good stem. It is good for a pot plant or cut. We consider it a money maker for the grower. The color is good for Christmas, it being a bright Geranium red. The New and Better DAHLIAS

Green Plants in Paper Pots. Will give better results than tubers.

No flower has been so materially improved in the past ten years as the Dahlia. To compare the new varieties with flowers ten to thirteen inches across with the older types is a revelation to the average grower. Florists who are not growing the new and better varieties are neglecting a big opportunity for increased profits.

We are growing a very complete collection of the new varieties, selecting each year only those which show decided commercial merit and improvement. Each one of the new varieties listed is an improvement over anything yet introduced. Compare our prices with those of reliable growers—and place your order today.

Mark Hanna (Good & Reese, 1930.)—A new decorative Dahlia that is without question the best red Dahlia on the market today. No Dahlia in our fields has ever attracted more attention, and elicited more worthy comment, than Mark Hanna. The flowers are of the same shade as the popular Ricard Geranium—brilliant vermilion red. The plant is sturdy and of tall growth. Mark Hanna easily attains a diameter of 12 to 13 inches across when properly grown, and with perfectly full center. Mark Hanna is a Dahlia that is destined to rank among the world's finest. It is the par excellence of red Dahlias. **\$4.00 each, \$40.00 per 12.**

JANE COWL (Decorative) —No Dahlia, except Jersey's Beauty, has ever been in such great demand. We give the introducer's description. "Just imagine the Ideal Dahlia bush—fairly tall, with vigorous dark green, leather-thick foliage. Give it stems that are straight and strong, yet not clumsy. Then add monster blooms of glistening bronzy buff and salmon shades—blooms that will stop you every time you are near them, and you have a mental picture of our own Jane Cowl." Jane Cowl is held on the stem just as it should be—looking at you and slightly up. Some blooms are even set squarely on top of the stem, Insulinde fashion. The flowers are immense, of the full petaled decorative type, with just enough twist to the broad petals to add the touch of refinement. Continuing its sensational success as a seedling, Jane Cowl won more prizes last season than any other 1928 introduction—including in its triumphs at least two foreign countries. It has been called the world's "most perfect Dahlia."....	1.00	10.00	65.00	500.00

New ORIENTAL POPPIES

NO flower can draw more instant attention and leave a more lasting and pleasing impression than a bed of carefully selected Oriental Poppies. Either singly, or in mass, they give a touch of barbaric splendor offered by no other flower. For five years we have been carefully selecting new and better varieties which show superior merit and advancement over older types. For the first time, we are in position to offer in quantity a selected list of new varieties, each one of which is distinctly superior. The plants offered are from 2½" pots for February and later delivery.

Lula A. Neeley

FLANDERS—Considered one of the best new oxblood red varieties, a rare new shade in Poppies. \$0.50 each, \$5.00 per 12, \$35.00 per 100.

LULA A. NEELEY—This variety is our favorite. Good strong stems support flowers of brilliant oxblood red, the color holding until the last. We predict that this variety will become the most popular Poppy in America within a few years. \$3.50 per 12, \$25.00 per 100.

MASTERPIECE—A new silvery pink Poppy of great beauty. An excellent keeper when cut. \$0.50 each, \$5.00 per 12, \$35.00 per 100.

MRS. PERRY—Although this Poppy has been on the market for several years, it is not widely distributed. A bright clear pink color combined with vigorous growth makes Mrs. Perry one of the most beautiful varieties. \$1.30 per 12, \$12.00 per 100.

OLYMPIA—This new variety is of strong, vigorous habit, and produces its flowers profusely. When fully developed the flowers are about four inches in diameter. In color it is a rich flame scarlet overlaid with glistening golden salmon. Olympia is decidedly unique in that it is the only good semi-double poppy. \$1.50 per 12, \$10.00 per 100.

ORANGE QUEEN—We offer a selected type of this popular orange variety. Vigorous in growth and very early. \$1.20 per 12, \$8.00 per 100, \$75.00 per 1000.

PROSERPINE—Of the scarlets, Proserpine, with its striking buds, heavy stems and massive flowers, is undoubtedly the best.

You cannot be without this brilliant variety. \$2.25 per 12, \$15.00 per 100.

TRILBY—Enormous flowers of cerise scarlet. Very scarce and among the leaders. \$0.50 each, \$5.00 per 12, \$35.00 per 100.

WURTEMBERGIA—A striking flower of great size and substance. Brilliant scarlet in color. \$3.50 per 12, \$25.00 per 100.

HARDY LILIES

The leading and best varieties for forcing and garden planting.

LILIUM AURATUM (The Gold Banded Lily of Japan)—The largest and one of the most gorgeous hardy Lilies. The white flowers are often eight to ten inches across, bell-shaped, with slightly flaring and waved petals, each thickly dotted with maroon spots and marked by a showy bright yellow band down the center. Intensely fragrant. Blooms in July and August. First size bulbs. \$1.75 per 12, \$12.00 per 100, \$100.00 per 1000.

LILIUM RUBRUM—Considered the finest of the showy Lilies. The main color is white, clouded, banded, and spotted with beautiful crimson and pink, giving the effect of some rare orchid. First size bulbs \$2.15 per 12, \$16.00 per 100, \$150.00 per 1000.

LILIUM GIGANTEUM (The Easter Lily)—The flowers are delightfully fragrant, pure waxy-white, of great substance, and if cut as soon as they are open, they can be kept for two weeks. A succession of bloom can be kept up from November to May by bringing the pots of rooted bulbs in from cold frames at intervals. As a garden Lily, it is of great beauty, being entirely hardy except in Northern climate, where it requires a protection of leaves or litter to the depth of five or six inches. First size bulbs, \$2.15 per 12, \$16.00 per 100, \$150.00 per 1000.

LILIUM CANDIDUM (The Madonna Lily)—The plants make healthy evergreen rosettes of leaves in the autumn,

from which stout stems, clothed with short leaves, arise in spring, bearing spire-like clusters of pure white, starry Lilies beautifully illumined by brilliant yellow anthers. They, too, are deliciously sweet, but are not so overpoweringly fragrant as some others, and may be cut and brought into the house with comfort. It blooms in June, immediately before the Royal Lily, at the same time as Delphinium Belladonna, with which it is frequently combined. As it is base-rooting only, it should be planted shallow. It likes good, well-limed garden soil and a sunny exposure. First size bulbs from 4-inch pots, \$3.25 per 12, \$25.00 per 100, \$225.00 per 1000.

LILIUM REGALE (The Royal Lily)—A very hardy easily grown variety from the mountains of Western China, and one of the most glorious of all. The flowers are gigantic, of true Lily shape, with long waxed petals, recurved at the tips, and lightly frilled along the edges. In effect it is pure white, but the center of the flower is richly suffused with golden yellow and the brilliant orange-yellow anthers are large and showy. The outside of the buds and the three outer petals are stained with purple-brown, which often gives a faint pinkish value to the flowers seen in quantity. Unequaled for magnificent effect. Stem rooting; plant moderately deep. First size bulbs, \$1.20 per 12, \$8.50 per 100, \$80.00 per 1000.

The New Variegated Ivy is decidedly worthwhile.

Artemisia Silver King A Plant of Rare Beauty for Landscape or Cutting For landscape effect from early summer until late winter, Artemisia Silver King is a most outstanding plant. For the cut flower trade the foliage of Artemisia Silver King is one of the greatest values as a filler for sprays or designs. It matures early in the summer and quickly hardens to a state when it can be cut and used without moisture. The foliage does not wilt or shatter after hardening off and can be carried dry indefinitely without losing its color. It thrives in ordinary soil, growing to a height of about three feet in almost perfect symmetrical form. The stems are well branched and thickly covered with bright silver colored foliage, but these quickly divide into a delicate lacy shape with the appearance of small flower buds all over the branches.....	1.10	7.50	Hardy Chrysanthemums See page 24. HARDY WATER LILIES

For Shipment April and Later.

Gardeners keeping apace with the increase in demand for Water lilies are making handsome profits. Hardy Water lilies are of easy culture, requiring only good garden soil with a mixture of well-rotted manure. They require no attention after planting, other than to see that the pool or tub has ample depth of water, preferably not less than one foot of water over the crown of the plant. We offer only the most satisfactory varieties.

	Per Each	Per 10		Per Each	Per 10
White			Red		
GLADSTONE —A pure white Lily of unusual size, and strong growth. Flowers often 6 to 8 inches across. It is one of the largest of the white Lilies, and requires plenty of room. Purest white, cup shaped with golden stamen.....	\$1.40	\$11.50	JAMES BRYDON —This is a very fine hardy Lily. Very free to bloom and a rapid grower. Flowers measure from 5 to 6 inches across. Broad massive petals, concave and incurving giving the flower a cup shape. It is a rich rose crimson. It is well adapted to either tub or pool culture. An early bloomer and you can count on it being in bloom every day.....	\$2.75	\$25.00
MARLIACEA ALBIDA —White petals with yellow stamens, and very fragrant. A continuous bloomer. Sepals are tinted with pink. Leaves are deep green above, and red beneath.....	1.00	10.00	GLORIOSA —A deep carmine rose color becoming deep red with age. A continuous bloomer, often reaching 5 to 6 inches in diameter. It is an ideal red Lily for either pool or tub culture.....	3.75	35.00
ODORATA —This is probably the most common of all Lilies. It is the native pond Lily common to our country. It is pure white with yellow stamens. It is very fragrant (\$22.50 per 100).....	.35	2.50	ATTRACTION —A recent French introduction. On first opening this is a garnet red. With age it deepens to a rich crimson. White sepals and yellow stamens.....	4.50	40.00
ODORATA GIGANTEA —Very similar to Odorata. Very large, pure white, and very fragrant. A free bloomer. We have no hesitation in recommending it (\$27.50 per 100).....	.40	3.00	ESCARBOUCLE —Flowers are bright vermilion. It is one of the finest of our offerings. A strong grower and a vigorous bloomer. To those who have been growing Lilies without this variety, it will prove a rare treat.....	4.00	35.00
Pink			Yellow		
ROSE AREY —We consider this the most desirable of any of the fragrant Lilies. No collection is complete without this flower. It has a brilliant pink color. The petals are pointed and incurved. It has golden yellow stamens. One of the very best bloomers, producing very large flowers often 7 to 8 inches in diameter. It is by far the finest of the pinks.....	1.95	17.50	MARLIAC CHROMATELLA —Flowers yellow 4 to 6 inches. Leaves green mottled with brown. A free bloomer. We consider this the finest of the Marliacs. This plant should be divided every few years. A charming canary yellow flower with bright yellow stamens.....	1.50	12.50
PINK OPAL —An attractive deep pink, a medium sized flower. It is especially adapted for cut flowers.....	1.50	12.50	Changeable Colors		
HELEN FOWLER —This is another pink with lighter center with flowers borne well above the water. It is especially adapted to tub culture. Of all Lilies this would be our choice for tub culture. It is very fragrant and a free bloomer. Flowers not so large but sure to please. What it lacks in size is more than offset by its continuous blossoms and sweetness.....	1.00	8.00	PAUL HARIOT —A free bloomer; light yellow delicately shaded copper red. Flowers are large and cup shaped. A free bloomer.....	2.50	22.50
TUBEROSA ROSEA —This is a strong vigorous grower with flowers well above the water. A very delicate shade of pink. Korean Chrysanthemum A remarkable new perennial of iron-clad hardness from Korea, forming fine large clumps 2 to 3 feet in both diameter and height. The large white flowers have golden centers, reminding a glorified Oxeve Daisy, the petals often turning to a light claret pink. It blooms in the greatest profusion in early October to early December. Of easy culture, thriving in any good garden soil. We believe the Korean Chrysanthemum possesses exceptional possibilities for cutting; there is nothing quite like it for the late fall.

The New Baby's Breath Aster A new introduction that is rapidly becoming very popular for garden and cut flower planting. It is distinctive in growth, making fine, round clumps 15 to 18 inches high. The foliage is dark green. Its flowering period, which is exceptionally long, begins about the first of August. As an alternative for Gypsophila for filling in cut flower work, it is being extensively used. It is also considered one of the best Rock Garden and perennial plants introduced in recent years. The flowers are pure white in color, and about one half to one inch in diameter.			
		2.75	24.00	Strong plants that will flower first season.			
Sweet Wivelsfield An entirely distinct and novel hardy Dianthus known as "Sweet Wivelsfield." This new race resulted from a cross between Dianthus Allwoodii and Sweet William (D. Barbatus) made seven years ago. For two hundred years or so, crosses have been made between Carnations and Sweet Williams, and Pinks and Sweet Williams, but the resulting hybrids have been sterile, producing no seed and have been difficult to propagate. However, this new race seeds reasonably well. Individual blossoms are nearly three times as large as those of Sweet Williams and are borne in loose cymes. The colors come in hundreds of various shades including rich reds and purples with black lacings, whites and pinks with flakes and many other colors with innumerable markings. We recommend this as being one of the finest new plants we have ever grown.				Per 12	Per 100	Per 1000

GOOD & REESE FAMOUS ASTERS

Our Asters are grown exclusively for us by John Bodger & Sons of California, who are undoubtedly the world's foremost growers of asters and zinnias. You are certain of receiving the finest seed obtainable.

California, Sunshine Asters

The Sunshine type was introduced into this country a few years ago and became quite popular because of its dainty appearance. It was accepted by florists as very desirable, but met with one objection—the flowers were borne on too short and weak stems. After several years of hybridizing and special selection, we are now pleased to offer a strain which fills the special requirements of florists, and makes a better strain for general use. California Sunshine Asters retain their dainty appearance but are larger and are borne on long, stout stems, and the plant has the general appearance of being as robust as the Giant Washington or the upright branching types. The stems measure two to two and a half feet, while those of the earlier type measure about one and one half feet. We consider California Sunshine a distinct improvement on the original Sunshine. We offer the following colors: flesh, pink, carmine, lavender and violet.....

GYPSOPHILA BRISTOL FAIRY

A FLORISTS' MONEYMAKER!

IN BRISTOL FAIRY we have a wonderful advance over all other types. The flowers are perfectly double, pure snow white and two to three times the size of *Gypsophila paniculata flore plena*. Bristol Fairy blooms early and continues to throw up flowers from the base, bearing fine sprays from June until killing frost. The dried flowers retain their pearly whiteness throughout the winter so that they can be depended upon to lighten the stiffness and formality of winter bouquets.
